

Milestone 2B: Progress and Tasks

GitFighters

Milestone 1 tasks:

Golo - Introduction & Background of the documentation

Hugo - How to use the package in the documentation

Manana - Implementation part of the documentation

Tale - Software Organization part of the documentation

Everyone - attended weekly meetings; decided the software architecture and implemented

TravisCI/Codecov integrations

Milestone 2 tasks:

Golo - implement `__abs__`, `__neg__`, `__pow__`, `__log__`, `__exp__` with docs and tests

Hugo - define `__ne__`, `__mul__`, `__sin__`, `__arcsin__`, `__truediv__` with docs and tests

Manana - define `__add__`, `__pos__`, `__div__`, `__tan__`, `__arctan__` with docs and tests

Tale - define `__eq__`, `__sub__`, `__cos__`, `__arccos__`, `__rtruediv__` with docs and tests

Everyone - attend the weekly meetings and the meeting with our TF

*** Note that everyone does debugging and overall testing
